

FIREWISE VIDEO LINKS

The following videos are courtesy of the Firewise Communities Program and are prepared to help homeowners learn about wildfire and how to prepare their homes and communities. We have selected three of these videos below. Click on the links at the right of each thumbnail to watch the video, or go to the Firewise Communities Website for these videos and much more information at: <http://www.firewise.org> .

Wildfire: Prevent Home Ignition Part 1 & 2

Wildfire! Preventing Home Ignitions is based on the research of Jack Cohen, Physical Research Scientist, of the U.S. Forest Service. It explains the combustion process and wildfire behavior, what you can do to create survivable space, and why some homes are destroyed while others survive. It also discusses how to identify your home's Ignition Zone - the area that includes the home and its immediate surroundings, which, if properly conditioned, can save the home during a wildfire.

Making Your Home Firewise

This video presents ideas and techniques for homeowners when constructing or modifying home in the wildland/urban interface areas. Topics covered in the video are: Roof, Windows, Eaves, Decks, and Landscaping. The video also provides information that a prevention officer or anyone with cooperative duties can use in a presentation or as a basis of discussion for various local groups.
