Hello Monrovia City Council,

My son and I are routine L line commuters, and live to the west of the Monrovia Station on Fano west of Mayflower. We are excited to see this step at opening better pedestrian access to the L Line station for those walking from the west.

We continue to hope that Monrovia and Metro can work together to create an access way to the west end of the westbound platform, close to Magnolia. Having to walk past the platform is really frustrating, particularly as the majority of the residential development going in is west of the station. It was a mistake to develop the station with a priority on car access from the drop off and parking garage, and continued effort to fix this mistake is needed and appreciated. Perhaps future development can contribute to the cost of easier access from the west?

Nonetheless, the elements described in this agenda item are appreciated. Hopefully that evolution of the station will be an early action by the developer?

Thank you,

Mike Antos
